rl: verifier-guided RL

step 2,500 of 2,500 · 17.5 h · validation accuracy 0.608 → 0.938

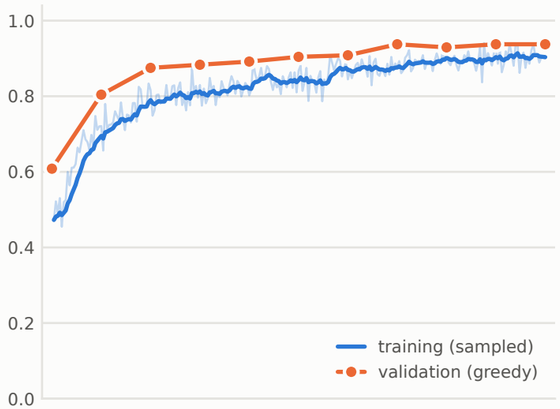

Reward

verifier reward per reply, 0 to 1

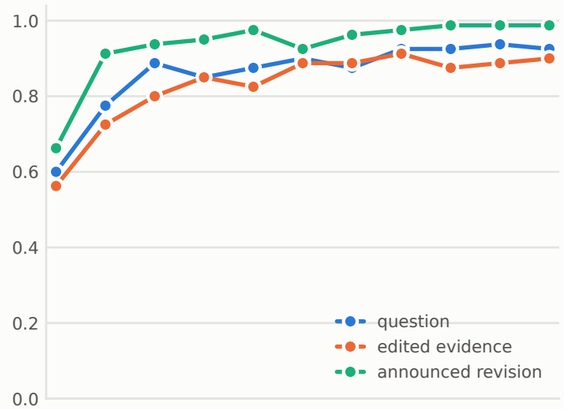

Answer accuracy

share of replies with the correct option

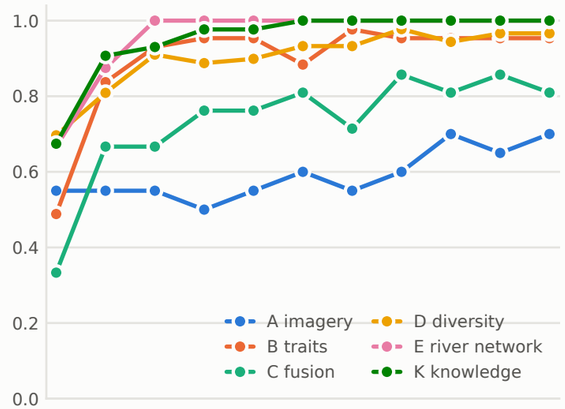

Validation accuracy by record type

greedy replies

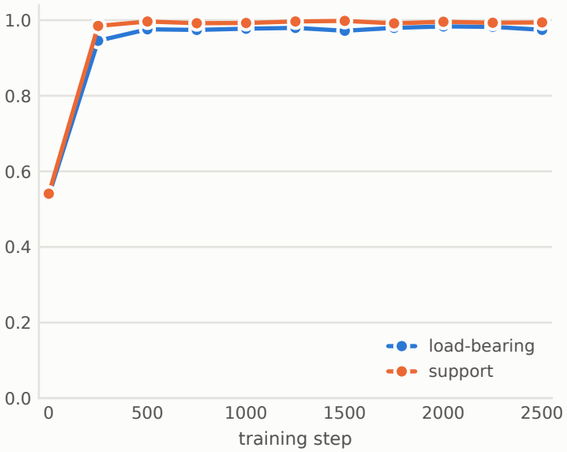

Validation accuracy by question group

greedy replies

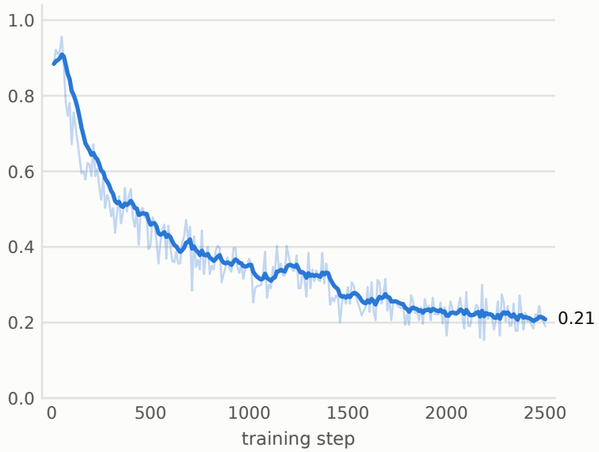

Citation F1 on validation

cited witnesses against the rule-derived sets

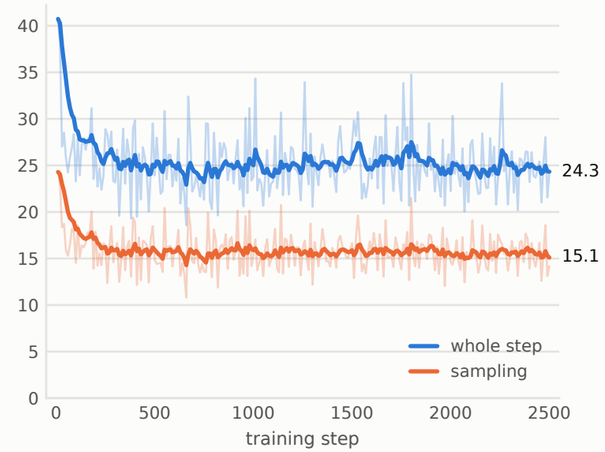

Prompts with a learning signal

share of training prompts whose samples differ in reward

Seconds per step

wall-clock seconds, one GPU step

Peak GPU memory

GB, maximum over the GPUs
